PROFESSIONAL SUMMARY

Results-driven Full-Stack Developer with hands-on experience designing, developing, and deploying scalable web applications. Skilled in React.js, Node.js, Express.js, MongoDB, MySQL/Sequelize, and Tailwind CSS, with a strong background in building REST APIs, authentication systems, subscription-based SaaS platforms, e-commerce solutions, logistics systems, fintech applications, and workflow automation platforms. Proven track record of delivering secure, user-centric, and performance-optimized solutions.

TECHNICAL SKILLS

- **Frontend:** React.js, Next.js, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS
- **Backend & SaaS Architecture:** Node.js, Express.js, PHP/Laravel, Event-Driven Systems, RESTful APIs
- **Databases & ORMs:** MongoDB/Mongoose, MySQL/Sequelize
- **Tools & Deployment:** Git, GitHub, Vercel, JWT, OAuth
- **UI/UX:** Responsive Design, Figma, Cross-Browser Optimization
- **Payments & Security:** Stripe API, Moniepoint API, Paystack, Cryptocurrency Payments, Signature Verification, SSL/HTTPS Security

PROFESSIONAL EXPERIENCE

Front-End Developer | Programmers City

February 2023 – May 2023 (Internship)

- Built dynamic, responsive UIs with React.js and Tailwind CSS, improving load performance and user engagement.
- Integrated REST APIs and implemented secure authentication flows (JWT, OAuth).
- Collaborated with backend engineers to deliver scalable, cross-browser compatible applications.
- Enhanced client applications by applying code optimization and reusable component design.

Full-Stack Developer | Freelance / Independent

2023 – Present

- Design and develop full-stack web applications for clients and businesses using React.js, Node.js, Express.js, MySQL, and MongoDB.
- Build RESTful APIs, authentication/authorization systems, dashboards, payment integrations, subscription workflows, and third-party integrations.
- Translate business requirements into production-ready applications and collaborate with clients, designers, and other developers.
- Deploy, maintain, debug, and improve applications in production environments.
- Use Git/GitHub for version control and collaborative development.

PROJECTS

YourShopGo – Subscription-Powered Grocery Shopping Platform | **April 2026 – June 2026** | <https://www.yourshopgo.co.uk/>

- Developed a full-stack grocery concierge platform enabling customers to submit requests, receive quotations, approve orders, make payments, and track deliveries.
- Built Stripe-powered subscription management supporting pay-as-you-go and premium plans with automated billing and webhook-driven lifecycle management.
- Implemented quotation and order workflows covering sourcing, service fees, payment, shopping, delivery, and completion.
- Integrated Stripe Card Elements, refunds, real-time in-app notifications, and email notifications.
- Developed admin dashboards for managing users, subscriptions, quotations, payments, orders, and platform operations.
- Built analytics dashboards providing visibility into orders, payments, subscriptions, and platform activity.
- **Stack:** React.js, Node.js, Express.js, MySQL/Sequelize, Stripe, Tailwind CSS, Nodemailer.

Hezmart – E-Commerce Platform | **April 2025 – July 2025** | <https://hezmart.com>

- Developed a full-featured e-commerce solution using React.js, Node.js, Express.js, and Sequelize.
- Featuring a robust website and backend that seamlessly powers both web and mobile experiences.
- Implemented multi-role management system (admins, vendors, customers) with secure authentication (local & Google).
- Integrated Paystack and cryptocurrency payments for seamless fiat and digital transactions.
- Built vendor dashboards for inventory, sales tracking, and product uploads.
- Designed admin tools for monitoring transactions, dispute resolution, and analytics.
- **Stack:** Express.js, react.js, tailwindcss, Mysql/sequelize

Winsubz – Digital Services & Trading Platform | **November 2025 – Present** | <https://www.winsubz.com/>

- Developed a web platform supporting airtime/data top-up, electricity and cable payments, gift-card trading, and social media boosting.
- Implemented wallet funding and account creation integrations using the Moniepoint and PocketFi APIs.
- Built responsive customer and administrative interfaces with transaction and notification workflows.
- Implemented secure transaction handling and real-time notifications for customers and administrators.
- **Stack:** React.js, Node.js/Express.js, MySQL/Sequelize, Tailwind CSS, Moniepoint API, Pocketfi API.

Daylad Expo – Booth Booking Platform | **September 2023** | <https://dayladexpo.com.ng/>

- Designed a responsive expo booth booking system with user authentication and booking management.
- Integrated email notifications for booking confirmations and updates.
- **Stack:** Laravel, React.js, MySQL.

ZillShip – Shipment & Logistics Management Platform | **December 2025** | <https://zillship.vercel.app/>

- Developed a full-stack shipment and logistics platform for creating, managing, and tracking deliveries in real time.
- Implemented automatic tracking number generation for new shipments and secure shipment record management.
- Built features for sender/receiver management, shipment status updates, and delivery history tracking.
- Integrated Cloudinary for secure image uploads and document handling.
- Designed a responsive and user-friendly dashboard for monitoring shipments and operational activities.
- Implemented backend validation, error handling, and structured RESTful APIs.
- Added multi-language support using Google Translate integration for broader accessibility.
- Focused on scalability, clean architecture, and performance-optimized queries.

Stack: Next.js, React.js, Node.js, Express.js, MongoDB/Mongoose, Cloudinary, Tailwind CSS

The Real World— Cryptocurrency Trading Platform | **October 2025** | <https://jointherealworld2.com/>

- Developed a cryptocurrency investment platform supporting deposits, withdrawals, and profit monitoring.
- Designed and built admin dashboard to manage users, transactions, and investment plans.
- Implemented data integrity checks and encryption to secure transactions.
- **Stack:** React.js, Node.js, Express.js, MySQL/Sequelize.

Trust Platform Finance – Cryptocurrency Trading Platform | **April 2024** | <https://trust-platform-massive-finance.vercel.app/>

- Developed a cryptocurrency investment platform supporting deposits, withdrawals, and profit monitoring.
- Designed and built admin dashboard to manage users, transactions, and investment plans.
- Implemented data integrity checks and encryption to secure transactions.
- **Stack:** React.js, Node.js, Express.js, MySQL/Sequelize.

Wavehub – Blogging Platform | **August 2024** | <https://wavehub.com.ng/>

- Built a content management system with category management, post moderation, and user roles (admin/author).
- Developed a responsive UI with React.js and Tailwind CSS.
- Enabled comment approval/disapproval workflows for better community moderation.
- **Stack:** React.js, Node.js, MySQL/Sequelize.

EDUCATION

- **Higher National Diploma (HND) in Mechatronics Engineering**
Federal Polytechnic Nekede, Owerri
2024 – 2026
