PROFESSIONAL SUMMARY

Results-driven Full-Stack Developer with hands-on experience designing, developing, and deploying scalable web applications. Skilled in React.js, Node.js, Express.js, MongoDB, MySQL/Sequelize, and Tailwind CSS, with a strong background in building REST APIs, authentication systems, subscription-based SaaS platforms, e-commerce solutions, logistics systems, fintech applications, and workflow automation platforms. Proven track record of delivering secure, user-centric, and performance-optimized solutions.

TECHNICAL SKILLS

- **Frontend:** React.js, Next.js, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS
- **Backend & SaaS Architecture:** Node.js, Express.js, PHP/Laravel, Event-Driven Systems, RESTful APIs
- **Databases & ORMs:** MongoDB/Mongoose, MySQL/Sequelize
- **DevOps & Tools:** Git/GitHub, REST APIs, JWT/Auth, Cloud Deployment (Vercel)
- **UI/UX:** Responsive Design, Figma, Cross-Browser Optimization
- **Payments & Security:** Stripe API, Moniepoint API, Paystack, Cryptocurrency Payments, Signature Verification, SSL/HTTPS Security

PROFESSIONAL EXPERIENCE

Front-End Developer (Remote) | Programmers City
February 2023

- Built dynamic, responsive UIs with React.js and Tailwind CSS, improving load performance and user engagement.
- Integrated REST APIs and implemented secure authentication flows (JWT, OAuth).
- Collaborated with backend engineers to deliver scalable, cross-browser compatible applications.
- Enhanced client applications by applying code optimization and reusable component design.

PROJECTS

Hezmart – E-Commerce Platform | <https://hezmart.com>

- Developed a full-featured e-commerce solution using React.js, Node.js, Express.js, and Sequelize.
- Featuring a robust website and backend that seamlessly powers both web and mobile experiences.
- Implemented multi-role management system (admins, vendors, customers) with secure authentication (local & Google).
- Integrated Paystack and cryptocurrency payments for seamless fiat and digital transactions.
- Built vendor dashboards for inventory, sales tracking, and product uploads.
- Designed admin tools for monitoring transactions, dispute resolution, and analytics.
- Stack: Express.js, react.js, tailwindcss, Mysql/sequelize

YourShopGo – Subscription-Powered Grocery Shopping Platform | <https://www.yourshopgo.co.uk/>

- Designed and developed a full-stack grocery concierge platform that enables customers to submit grocery requests, receive quotations, approve orders, make payments, and track deliveries through a streamlined workflow.
- Built a subscription management system integrated with Stripe, supporting both pay-as-you-go and premium subscription plans with automated billing and webhook-driven subscription lifecycle management.
- Implemented dynamic quotation workflows where administrators can review customer requests, source items, generate quotations, and manage service fees based on customer subscription status.
- Developed a complete order management system covering the entire lifecycle from quotation approval and payment to shopping, delivery, and completion.
- Integrated Stripe Card Elements for secure in-app payments and implemented refund management functionality for administrators.
- Built real-time in-app notification and email notification systems to keep customers and administrators informed about request submissions, quotations, payments, order updates, and delivery progress.
- Developed administrative tools for managing users, subscriptions, quotations, payments, orders, and platform operations.
- Implemented analytics dashboards for both administrators and customers, providing visibility into orders, payments, subscription activity, and platform performance.
- Designed the platform with scalability, maintainability, and business workflow automation as key objectives.
- **Stack:** React.js, Node.js, Express.js, MySQL/Sequelize, Stripe, Tailwind CSS, Nodemailer.

Daylad Expo – Booth Booking Platform | <https://dayladexpo.com.ng/>

- Designed a responsive expo booth booking system with user authentication and booking management.
- Integrated email notifications for booking confirmations and updates.
- **Stack:** Laravel, React.js, MySQL.

Winsubz – Data top up, airtime top up, electricity bill, cable subscription, Gift cards and Cryptocurrencies Trading Platform | <https://www.winsubz.com/>

- Designed and developed a responsive and secure web platform for customers to trade crypto and gift card seamless
- Sleek, user-friendly interface
- Fast & secure transactions
- Real-time notifications for both customers and admin
- **Stack:** Express.js, react.js, tailwindcss, Mysql/sequelize, moniepoint api for account creation and wallet funding

ZillShip – Shipment & Logistics Management Platform || <https://zillship.vercel.app/>

- Developed a full-stack shipment and logistics platform for creating, managing, and tracking deliveries in real time.
- Implemented automatic tracking number generation for new shipments and secure shipment record management.
- Built features for sender/receiver management, shipment status updates, and delivery history tracking.
- Integrated Cloudinary for secure image uploads and document handling.
- Designed a responsive and user-friendly dashboard for monitoring shipments and operational activities.
- Implemented backend validation, error handling, and structured RESTful APIs.
- Added multi-language support using Google Translate integration for broader accessibility.
- Focused on scalability, clean architecture, and performance-optimized queries.

Stack: Next.js, React.js, Node.js, Express.js, MongoDB/Mongoose, Cloudinary, Tailwind CSS

The Real World – Cryptocurrency Trading Platform | <https://jointherealworld2.com/>

- Developed a cryptocurrency investment platform supporting deposits, withdrawals, and profit monitoring.
- Designed and built admin dashboard to manage users, transactions, and investment plans.
- Implemented data integrity checks and encryption to secure transactions.
- **Stack:** React.js, Node.js, Express.js, MySQL/Sequelize.

Trust Platform Finance – Cryptocurrency Trading Platform | <https://trust-platformfinance.vercel.app/>

- Developed a cryptocurrency investment platform supporting deposits, withdrawals, and profit monitoring.
- Designed and built admin dashboard to manage users, transactions, and investment plans.
- Implemented data integrity checks and encryption to secure transactions.
- **Stack:** React.js, Node.js, Express.js, MySQL/Sequelize.

Wavehub – Blogging Platform | <https://wavehub.com.ng/>

- Built a content management system with category management, post moderation, and user roles (admin/author).
- Developed a responsive UI with React.js and Tailwind CSS.
- Enabled comment approval/disapproval workflows for better community moderation.
- **Stack:** React.js, Node.js, MySQL/Sequelize.

EDUCATION

- **Higher National Diploma (HND) in Mechatronics Engineering**
Federal Polytechnic Nekede, Owerri
2024 – 2026
